STARPRINTHT 13*-126164	126"X164' 130Z	\$265.36

*Short roll 18 cents per sq ft

StarPrint HT banner combines high tenacity polyester yarn, woven into scrim fabric with 9 x 9 thread count, encapsulated in PVC film, front and back. With this construction, the higher-strength, high tenacity yarn has the same or better tear and tensile properties as do competitive 13 oz banners using 1000 denier yarn (1), (2). It has a smooth print face with a slight scrim pattern, natural white in color. Printable by solvent, Eco-solvent, UV, Latex and screen. Ideal for outdoor banner, indoor banner and point-of-sale retractable banner stands and frames.

PARAMETER	TEST METHOD	VALUE
SUPPORT MATERIAL	DIN 60001	100% POLYESTER YARN, HT
THREAD COUNT		9 X 9 ... PER INCH, WARP AND WEFT)
